CLINICAL ANATOMY OF THE MITRAL VALVE
(CADAVERIC COURSE)

DATE: Thursday 29 January 2015
VENUE: Clinical Anatomy Skills Centre,
University of Glasgow, Thomson Building,
G12 8QQ
CLOSING DATE: Friday 9 January 2015
This multidisciplinary and highly interactive course aims to provide in-depth understanding of cardiac anatomy, with an emphasis on the surgical and echocardiographic anatomy of the mitral valve.

The faculty comprises consultant cardiologists, anaesthetists and surgeons. Course work will comprise prosection of the human heart, hands-on instruction on TOE using simulators, group cadaveric work with intact human thoraces including exposure and assessment of valves in situ, video presentations and didactic teaching.

The course is ideally suitable for cardiology, cardiac surgery and anaesthesia trainees ST3-6.

Providing hands on experience using fresh/frozen cadaveric material this one day course will include:

- Assessment of mitral valve repairability using TOE
- Assessment of risk of SAM using TOE
- Surgical evaluation of the mitral valve
- Principles of valve repair and an understanding of techniques of repair
- Intraoperative decision-making
- Peri and post operative assessment of valve repair

This course will be held in the Royal College of Physicians and Surgeons of Glasgow’s state of the art Clinical Anatomy Skills Centre (CASC) based at the University of Glasgow.
REGISTRATION FORM
Clinical Anatomy of the Mitral Valve (Cadaveric Course)

Name: ____________________________________________________________
Position: __________________________________________________________
