Registration will be confirmed only when payment is completed.
Cancellations must be received in writing before 3rd January 2012. No refunds will be issued after this date. Refunds will incur a 15% administration charge.
Dear Colleagues

Obesity and its consequences are set to become one of the most important health care issues of the next few decades. Navigating through the vast array of available medical treatments has been able to consistently address the obesity epidemic, which continues to affect patients’ health, quality of life and the wider impact on society. We believe that the challenge needs to be addressed through a multidisciplinary approach involving and promoting collaboration across different specialties including physicians, surgeons, policy makers, commissioners and managers.

“London 2012: The Future of Obesity Treatment” aims to review the current status of obesity treatment and to discuss how best to address the challenges in the future.

We are privileged to have the world’s leading authorities to address this challenging topic and we aim to make the meeting as interactive as possible with expert panel discussions and a final debate on the different treatment options.

The meeting is open to general practitioners, surgeons, physicians, diabetologists, endocrinologists, gastroenterologists, endoscopists, commissioners and managers, all of whom face their own specific challenges in this evolving field. Our invitation is also extended to trainees and allied health care professionals involved in the specialist management of patients suffering from obesity.

We are delighted to invite you to attend this art state International Symposium on February 3rd 2012 at the Royal College of Physicians in London.

The International Symposium is endorsed by: 

Gianluca Bonanomi, MD, FRCS
Consultant Surgeon
Syngeneum
Chelsea and Westminster
National Obesity Forum
London, United Kingdom

Carel Le Roux, PhD, FRCP
Bobby Prasad, FRCSI
Reader in Metabolic Medicine
Consultant Gastroenterologist
Imperial College London
Chelsea & Westminster
London, United Kingdom

Richard Haining, MD
Professor of Surgery
Royal College of Surgeons
London, United Kingdom

Derek Aldington, MD, FRCS
Chairman, National Obesity Forum
Royal College of Physicians
London, United Kingdom

The Future of Obesity Treatment

An International Multidisciplinary State of The Art Update

MORNING SESSION: THE MEDICAL APPROACH TO OBESITY
Chairs: James Ahluquist (Royal Society of Medicine), Michael Fisher (Chelsea & Westminster)

10:00–10:20
Obesity: What is the challenge for the community?
Dr. David Haslam, Chairman, National Obesity Forum

10:20–10:40
Which patients stand to gain most from obesity treatment?
Dr Simon Aylwin, King’s College London

10:40–11:00
What is the current status of obesity and diabetes treatment?
Prof John Wilding, University of Liverpool

11:00–11:20
How can health care systems afford obesity and diabetes treatment?
Mike Lander, Commissioner South East Coast England

11:20–11:40
Coffee

MORNING SESSION: NOVEL THERAPEUTIC APPROACHES TO OBESITY
Chairs: Bobby Prasad (Chelsea & Westminster), Kevin Shollfr (Chelsea & Westminster)

11:40–12:00
Is the magic medicine on the horizon?
Prof Steve Bloom, Imperial College London

12:00–12:20
Can obesity be treated using an endoscope?
Dr. Christopher Thompson, Imperial Medical School, Boston, USA

12:20–12:50
Panel discussion
Martin Benyon (CAW), Shamil Chandaria (NOF), Bobby Prasad (CAW), Julian Teare (Imperial). Christopher Thompson (USA), John Wilding (Liverpool)

12:50–13:50
Lunch

AFTERNOON SESSION: THE SURGICAL APPROACH TO OBESITY
Chairs: Ahmed R. Ahmed (Imperial), Evangelos Efthimiou (Chelsea & Westminster)

13:50–14:00
The future of obesity treatment: how can we influence policy makers?
Mr. Michael Parker, Royal College of Surgeons

14:00–14:20
What are the long term outcomes of bariatric surgery? The good, the bad and the ugly.
Dr. Nicolae Christou, McGill University, Montreal, Canada

14:20–14:40
What clinical evidence do we need to move bariatric and metabolic surgery forward?
Dr. Philip R. Schauer, Cleveland Clinic, USA

14:40–14:55
What does basic science today predict for future obesity treatments?
Nicola Finnecy, (Canada), David Kargi (Liverpool), Torsten Olbers (Imperial), Philip R. Schauer, (USA), James Smellie (CAW), Jeremy Thompson (CAW)

14:55–15:20
Panel discussion
Nicolae Christou (Canada), David Kargi (Liverpool), Torsten Olbers (Imperial), Philip R. Schauer, (USA), James Smellie (CAW), Jeremy Thompson (CAW)

15:20–15:40
Coffee

DEBATE: OBESITY IS THE QUESTION What will be the answer - a tablet, an endoscope or a scalpel?
Chairs: Gianluca Bonanomi (Chelsea & Westminster), Carel Le Roux (Imperial)

15:40–16:00
Medical motion: Prof Nicholas Flex University College London
Endobalonic Motion: Dr. Christopher Thompson, Harvard Medical School, Boston, USA
Surgical Motion: My Alberic Finne, President, British Obesity and Metabolic Surgery Society

16:40–17:00
Recommendations and Closing Remarks

London 2012
Dear Colleagues,

Obesity and its consequences are set to become one of the most important health care issues of the next few decades. Nutrition and public health policy are the available medical treatments have been able to consistently address the obesity epidemic, which continues to affect patients’ health, quality of life and the wider impact on society. We believe that the challenge needs to be addressed through a multidisciplinary approach involving and promoting collaboration across different specialities including physicians, surgeons, policy makers, commissioners and managers.

“London 2012: The Future of Obesity Treatment” aims to review the current status of obesity treatment and to discuss how best to address the challenges in the future. We are privileged to have the world’s leading authorities to address this challenging topic and we aim to make the meeting as interactive as possible with expert panel discussions and a final debate on the different treatment options.

The meeting is open to general practitioners, surgeons, physicians, diabetologists, endocrinologists, gastroenterologists, endoscopists, commissioners and managers, all of whom face their own specific challenges in this evolving field. Our invitation is also extended to trainees and allied health care professionals involved in the specialist management of patients suffering from obesity.

Dear Colleagues

Obesity and its consequences are set to become one of the most important health care issues of the next few decades. NASH, Type 2 Diabetes, and public health policy now identify obesity and diabetes as significant public health challenges. It is highly likely that obesity will become the most common cause of death in the West of Europe within the next few decades. Neither public health policy nor the available medical treatments have been able to consistently address the obesity epidemic, which continues to affect patients’ health, quality of life and the wider impact on society. We believe that the challenge needs to be addressed through a multidisciplinary approach involving and promoting collaboration across different specialities including physicians, surgeons, policy makers, commissioners and managers.

“London 2012: The Future of Obesity Treatment” aims to review the current status of obesity treatment and to discuss how best to address the challenges in the future.
